Division by Sharing (Word Problems 1)

Name: ___________________________  Date: ___________________________

Jordan has a bag of 16 sweets. If he shares them equally with his brother, how many sweets will they get each?

- 16 sweets
- 2 people
- 8 sweets each

\[ 16 \div 2 = 8 \]

Three friends found some conkers and shared them out. If there were 18 conkers altogether, how many did they get each?

- 18 conkers
- 3 people
- 6 conkers each

\[ 18 \div 3 = 6 \]

A chef shares 14 pieces of pepperoni onto two pizzas. How many did he put on each one?

- 14 pepperoni
- 2 pizzas
- 7 pepperoni each

\[ 14 \div 2 = 7 \]

There are 20 children in class 2G. Their teacher sorted them into four equal groups. How many children were there in each group?

- 20 children
- 4 groups
- 5 children each

\[ 20 \div 4 = 5 \]

Marge gives her three grandchildren £21 to share between them. How much money do they get each?

- £21
- 3 grandchildren
- £7 each

Mrs. Jones plants 24 flowers equally in four rows. How many flowers does she plant in each row?

- 24 flowers
- 4 rows
- 6 flowers each

\[ 24 \div 4 = 6 \]
