

# Finding Halves by Undoing Doubles

Name: \_\_\_\_\_

Date: \_\_\_\_\_

- Use the fact that doubles and halves are opposites to help you complete the following...

$$\text{double } 4 = 8$$

$$\text{so half of } 8 = 4$$

$$\text{double } 6 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 2 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 9 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 8 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 1 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 5 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 7 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 11 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 3 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 10 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$

$$\text{double } 12 = \underline{\quad}$$

$$\text{so half of } \underline{\quad} = \underline{\quad}$$
