| second | minute | hour | day | week |
| :---: | :---: | :---: | :---: | :---: |
| month | year | decade | century |  |

60 seconds $=1$ $\qquad$
24 hours = 1 $\qquad$
12 months = 1 $\qquad$
1 year = $\qquad$ days (normal)

60 minutes $=1$ $\qquad$
7 days $=1$
1 year =___ weeks (approx.)
1 year = $\qquad$ days (leap year)

Thirty days hath September, April, June, and November. All the rest have thirty-one, Excepting February alone, And that has twenty-eight days clear, And twenty-nine in each leap year.

- Use the rhyme above to help you complete the following table...

| Month | Number of Days |
| :--- | :--- |
| January |  |
| February (not a leap year) |  |
| February (in a leap year) |  |
| March |  |
| April |  |
| May |  |
| June |  |
| July |  |
| August |  |
| September |  |
| October |  |
| November |  |
| December |  |
